KENNETH F. HAINES, JR. TO SERVE AS A MEMBER OF THE NATIONAL CONSTRUCTION DISPUTE RESOLUTION COMMITTEE

COMMACK, NY – May 19, 2008 – Nautilus Consulting announces that **Ken Haines has been named to serve as a member of the National Construction Dispute Resolution Committee (NCDRC)**, where he will represent the Construction Institute of the American Society of Civil Engineers. Ken is the past Chairman of the Claims Avoidance and Resolution Committee of the Construction Institute.

Representatives of the more than 30 organizations within the construction industry constitute the NCDRC, which serves as an advisory body to the American Arbitration Association on mediation and arbitration procedures.

The mission of the NCDRC is to provide comprehensive guidance to the American Arbitration Association on its construction dispute avoidance, management and resolution services. The NCDRC provides guidance to the AAA on rules, administrative policies, the roster of neutrals, and binding and non-binding forms of ADR. It also provides input on education and training programs, outreach, and the appropriate use of technology, with the goal of improving AAA services and expanding the use of dispute avoidance and resolution in the construction industry.

Ken Haines is a nationally renowned expert in the preparation and evaluation of construction claims and in the resolution of construction disputes. For more than 20 years, he has represented both owners and contractors in the preparation, evaluation and defense of hundreds of millions of dollars in claimed damages involving delay, acceleration, inefficiency and other impacts including differing site conditions and design deficiencies. Ken is the Director of the claims consulting group at Nautilus Consulting, LLC.

ABOUT NAUTILUS

Nautilus Consulting is a national construction consulting firm, specializing in construction claims analysis and associated damage calculation. With a strong emphasis on utilizing practical and court-tested methodologies, Nautilus has experts capable of analyzing the impact of change, delay, acceleration, inefficiency, damage, and other issues common in a construction dispute.
